Roger **Masellas Roca**

Web developer and teacher: web projects since 1996, front-end layout, WordPress and AI-assisted development (Claude Code)

roger@lamosca.com | +34 627 595 835 | Sant Feliu de Codines (Barcelona, Spain) | linkedin.com/in/roger-masellas | github.com/rogeraclaro | masellas.info

I have been building and coordinating web projects since 1996: 22 years as a founding partner of the Lamosca studio, leading its internet area for clients such as TV3, Sónar, CCCB, Mercat de les Flors and Barcelona City Council, and from 2018 to 2025 as a frontend developer at A!CLARO (custom WordPress, around 200 landing pages for Veepee and Privalia, the online shops of Laie, Sagrada Família and MNAC). Today I build complete solutions with Claude Code, such as the advanced search for the legal journal Indret and the GrausFP search engine. I have taught HTML5, CSS3 and content management systems in a web design master's programme and I am qualified to teach in vocational training (FP).

Skills

Web project coordination:	from brief to production together with the client; coordinating internal and external teams (up to 4 developers across Spain and Nicaragua), technical validation and delivery oversight.
Front-end layout:	HTML5, CSS3 (Flexbox, Grid), Sass, responsive and mobile-first design; pixel-perfect implementation from Figma, Adobe XD and Sketch; email newsletters (Mailchimp).
WordPress:	custom themes, templates and PHP plugins, Elementor; hosting, email and domain management (cdmon, dynahosting).
AI-assisted development:	Claude Code as a daily tool, AI agents and MCPs; REST/JSON API integration, scraping and PDF data extraction.
JavaScript and frameworks:	JavaScript, jQuery, React and Vue.js (layout and integration level), Bootstrap, PHP, MySQL.
Tools:	Git, GitHub, GitLab, Figma, Adobe XD, Photoshop, Illustrator, Premiere.

Experience

Freelance web developer

2025-Present

Main client: Indret, legal journal — Remote

- Indret's website, which I built and have maintained since its beginnings (first through Lamosca, now freelance).
- Advanced search in WordPress (JavaScript and PHP, built with Claude Code) over some 2,200 articles: free text, section, author, organisation, keywords, dates and issue number, with near-instant results. First version built solo in about a week, then refined with the editorial board.
- Follow-up commissions: a feasibility study for a RAG over the full article archive and a tool that automatically re-formats submitted articles that lack the required formatting.

Personal AI projects

2025-Present

Built with Claude Code — masellas.info

- **GrausFP**: a search engine that unifies scattered official information on Spanish vocational training using REST/JSON APIs, scraping and data extraction from 584 PDF annexes, with automatic updates, user accounts and alerts.
- **Persona(s) de interés**: restored the original look of a Google Maps map with custom CSS styling that had broken after changes in Google's code.
- **Fenya**, a job search engine that works from users' CVs (beta), and **AI Bookmarks**, a thematic link repository with a Chrome extension and a mobile app.

A!CLARO (Design & Solutions Inthe Network, S.L.)

2018-2025

Frontend Developer — Barcelona

- Custom WordPress themes, templates and PHP plugins, with development accelerated through Claude Code, AI agents and MCPs; sites built with Elementor; hosting, email and domain management.
- Around 200 offer-launch landing pages for Veepee and Privalia in six countries, built from Figma designs at a pace of 15 to 25 a month: first with jQuery and Bootstrap, later with Veepee's Vue.js component system and content served by its API.
- Front-end layout of the Laie online shop in React (JSX and Sass) from scratch, from Adobe XD designs, later adapted for Sagrada Família and MNAC, in coordination with the back-end and checkout developers.
- Led a team of up to 4 developers across Spain and Nicaragua: task allocation across two time zones, technical validation and oversight of final delivery to the client.
- Email newsletters for several clients with Mailchimp.

Lamosca sccl *1996-2018*

Founding Partner, Project Lead / CTO — Barcelona

- Led the multimedia area and later the internet area of an 8-person design and multimedia studio: end-to-end projects with the client, from design to production, coordinating external teams when needed.
- Modules of TV3's first corporate portal and CCRTV websites, corporate portal and intranet of the Agència Catalana de Notícies, the Sónar website (2001-2008), the Mercat de les Flors corporate and ticketing portal, interactive pieces for Barcelona City Council.
- Email newsletter layout (Sónar, Ciudades Patrimonio, the monthly internal newsletter for Barcelona City Council staff) and hosting, email and domain management.
- Other clients: CCCB, Festival Grec, Filmoteca de Catalunya, TMB, Òmnium Cultural, Rockdelux, FAD, Editorial Barcino, Fundació Bofill.
- Technologies: HTML5, CSS3, JavaScript, jQuery, Angular, WordPress, PHP, MySQL.

Escola Superior de Disseny Seeway *2014-2017*

Lecturer — Barcelona

- Taught "HTML5, CSS3 and Content Management Systems" in the Master's in Web Design, UX, UI and Prototyping and in the University Diploma in Graphic and Digital Design.

Escola Universitària Elisava *2010-2015*

Seminar Lecturer — Barcelona

- Seminars on Communication and the Internet.

Promsite, CDmon hosting sponsorship programme *2013-Present*

Jury member, web project evaluation

Universitat de Barcelona, Faculty of Medicine *1994-1996*

Programmer and Designer — Barcelona

- Programmed and designed the interactive CD "El Cráneo" within the EU pilot project "Metode - TEAM".

Universitat de Barcelona, Central IT Services *1990-1994*

User Training and Support — Barcelona

Education

Merin's *2026*

Official teaching qualification for Vocational Training (FP), grades A, B and C

Pimec *2026*

AI Tools for Career Guidance

IT Academy *2018*

Developer Program, Frontend specialization — Barcelona

Universitat de Barcelona *1987-1992*

Degree in Philosophy and Educational Sciences (not completed, 3 subjects pending) — Barcelona

Certification

TypeScript Essential Training

Languages

Catalan (native), Spanish (native), English (fluent), French (fluent).
